SKILLS

- HTML
- CSS
- React JavaScript
- GraphQL
- SQL database
- Google Firebase
- Python
- Django
- Golang (beginner)
- Java
- WordPress
- Photoshop

EXPERIENCE

COOK • MCDONALD • MAY 2014 – NOV 2016
I worked at McDonald for little over 3 years during the high school years. I started as a cook in the kitchen and slowly over the years I was trained to do almost everything in the restaurant. From front register helping customers to drive thru taking orders, to making burgers in the kitchen.

BARISTA • STARBUCKS • SEPT 2017 – OCTOBER 2019
I been with Starbucks for little under 2 years and it is a fun job. I adopted most of my customer service skills from my previous job at McDonald and applied to this job. From taking customers' orders, to making coffees at the coffee machine, to helping customers by answering any questions they have.

TELLER • GREAT WESTERN BANK • OCTOBER 2019 – JUNE 2020
I started this job late last year because I wanted a different working experience. My duty in this job title includes daily deposit, cash withdraw, and building strong relationship with customers

CASHIER • RED LANTERN • JUNE 2020 – PRESENT Recently, one of my good friends started a Vietnamese street cuisine restaurant and I decided to help him out during this difficult time. My duty in this job includes cashier, cook, and boba barista.

EDUCATION

HIGH SCHOOL DIPLOMA • MAY 2015 • BURKE HIGH SCHOOL

MIS BACHELOR • WORKING ON IT • UNIVERSITY OF OMAHA NEBRASKA

PAST EXPERIENCE

In the past few years, I have taken multiple web development courses at University of Omaha Nebraska includes intro to web development and web application development. I am fluent with HTML, CSS, and Google firebase web deployment. I have some background knowledge with Python and Django as I previously made a social media website as a personal side project and a group project in my Web Application Development class.

CURRENT PROJECTS

I am currently focusing on learning frontend web development with React JavaScript and GraphQL. During the summer, I have been teaching myself React JS by watching many YouTube tutorials. I also purchased courses from Udemy and Wes Bos to learn more about backend side of development. I have created few front-end websites such as Spotify clone page, Netflix clone page, Coronavirus tracker app, and I am currently working on a donut website called Square Donut. Below you can find some of the links to my recent projects as well as a link to my GitHub account.

Netflix clone using React JS: https://netflix-clone-ff957.web.app

COVID Tracker using React JS: https://covid-tracker-da6fe.web.app

Social media site using Django: http://marshpillow.pythonanywhere.com/
